-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 September 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 and 10-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 19 is/are allowed.
- 6) ☒ Claim(s) 1-8, 10-12 and 14-18 is/are rejected.
- 7) ☒ Claim(s) 13 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Remarks

This Office action is responsive to applicant's amendment filed September 13, 2006.

Claims 1-8 and 10-19 are pending.

Claim Rejections - 35 USC § 112

The rejection of claims 1-8 and 10-18 under 35 U.S.C. 112, second paragraph, has been withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 10-12, 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelm et al. (U.S. Pat. 5,486,215) in view of Urry (U.S. Pat. 4,333,994).

The rejection is maintained for the reasons of record. The examiner notes the present amendment to independent claim 1 now reciting that the current collector is disposed adjacent an exterior of ~~only~~ either only a majority of the final generally straight segment or only a majority of the penultimate turn, a majority of the penultimate generally straight segment and a majority of the final generally straight segment. It also appears to the examiner that the placement of the

Art Unit: 1745

term “only” as presently amended is to emphasize and claim that the current collector is limited to the area along the majority of either the final generally straight segment or penultimate turn/penultimate generally straight segment/final generally straight segment. To this extent, applicant submits that in Kelm et al. the current collector 5 is shown to extend the entire length of the anode assembly. This argument may have merit if the only feature disclosed by Kelm et al. deemed readable on the claimed current collector was current collector [5]. To do so, however, would interpret the prior art teachings in *literal* sense, i.e. the prior art “current collector” would naturally equate to the claimed “current collector.” As claims are given their broadest reasonable interpretation, Kelm et al. further disclose the following in col. 4 lines 52-59:

An alternative to the anode assembly 1 depicted is to dispense with the current collector 5 in favor of an anode which is made up almost entirely of an alkali metal or alkali metal alloy. In such a configuration, the alkali metal would be formed in a thicker cross-section at one end than at another and the connector tabs would be connected directly to the alkali metal.

In this configuration, the examiner asserts that the connector tabs [22] would be *structurally* and *functionally* equivalent to the claimed current collector, and as such would resultantly be placed adjacent an exterior surface of the final generally straight segment. It is further asserted that the connector tabs [22] as the current collector are also solid and planar, the latter feature albeit in a relatively smaller dimension as compared to the current collector [5]. See Figures 1 and 15 which shows the connector tabs [22] as a generally planar feature. In applying this reading of Kelm et al. to the present claims, the examiner additionally notes that there is no recitation of both a connector tab [20] and a current collector in the claims as otherwise disclosed in applicant's specification (par. [0050]) so as to differentiate a prior art teaching of a connector tab as being readable on a current collector. See par. [0050] of the disclosure.

Allowable Subject Matter

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or suggest a current collector that is adjacent the final turn and the final generally straight segment. In Kelm et al., the connector tab (deemed readable on the presently claimed current collector) is limited to only the final generally straight segment, as connector tabs are placed along the planar exterior surface of the coiled assembly, as shown in Figure 15.

Claim 19 is allowed. New claim 19 appears to be modeled after claim 13 with the additional recitation of the current collector being further “configured to be” disposed adjacent the final turn and the final generally straight segment. Thus, claim 19 is allowed for the same reasons for allowable subject matter for claim 13.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 1745

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian Mercado whose telephone number is (571) 272-1289. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
